

WE'RE HIRING

Façade & Structural Design Engineer

Rickard Engineering – Sydney

Significant project wins mean we are expanding our Sydney team. We are looking for a well-credentialed engineer to join our award-winning company in Sydney to work on projects both locally and internationally. The position involves the day-to-day work in a team of engineers under the supervision of our Senior Engineers and Associates. The role provides many exciting opportunities to work on interstate and international projects.

The Role offers the successful applicant a high variety of opportunities and duties, including:

- Interstate and international projects.
- Working with an innovative team on high-level engineering projects.
- Developing structural analysis skills using software, spreadsheets, and hand calculations.
- Undertaking site inspections.
- Preparing high-quality reports and other related documents.

Qualifications, Skills, and Experience

- Tertiary Engineering Qualification in Façade/Structural/Civil Engineering.
- Experience (2+ years) in façade engineering.
- Experience in the design of steel/concrete structures.
- Experience using engineering software including STRAND7, SpaceGASS, Robot, THERM, AutoCAD (or similar software).
- Knowledge and understanding of Australian Standards and Design Codes.
- Understanding of the BCA and Codes related to façade engineering.
- Interpersonal & communication skills, verbal & written.
- Ability to work in a team environment.
- Ability to analyse and design either with or without computer software.

All applicants must be either Australian citizens or permanent residents.

Only applicants required for interview will be contacted.
