

WE'RE HIRING

Senior Façade & Structural Engineer

Rickard Engineering – Sydney

An opportunity has become available for an ambitious person with the appropriate technical structural and façade engineering skills to step into a leadership role in our practice. The position involves the day-to-day management of a team of engineers, project management (including budget management) and client relationship management. The role provides many exciting opportunities to work on interstate and international projects.

The Role offers the successful applicant a high variety of opportunities and duties, including:

- Interstate and international projects.
- Working on diverse, interesting, and challenging residential, commercial, and industrial projects.
- Working with an innovative team on high-level engineering projects.
- Leading façade projects as well as reinforced concrete, structural steel, and timber design projects..

Qualifications, Skills, and Experience

- Tertiary Engineering Qualification in Façade/Structural/Civil Engineering.
- Experience (7+ years) in façade and structural engineering.
- Experience in the design of steel/concrete structures.
- Knowledge and understanding of Australian Standards and Design Codes.
- Understanding of the design process from tender concepts thru to IFC.
- Understanding of the BCA and Codes related to façade engineering.
- Strong interpersonal & communication skills, verbal & written.
- Ability to work autonomously and as a team manager.
- Ability to work under pressure and tight deadlines.

All applicants must be either Australian citizens or permanent residents.

Only applicants required for interview will be contacted.
